

REVIEWER'S REPORT

Date: 28/09/2022

Manuscript Title : **Measuring the attenuation length of muon number in the air shower with muon detectors of 3/4 LHAASO array**

Authors : **Xiaoting Feng, Hengying Zhang, Cunfeng Feng, Lingling Mab (on behalf of the LHAASO Collaboration)**

It is observed that in this version authors have only slightly implemented my previous report on the paper. Still I stand with my whole previous report. Authors of this paper must respect and implement fully and effectively my previous report for recommending the paper to be published in the proceedings of ISVHECRI 2022.
